

Our disinfectant formulas are proven to kill 99.9% of the designated test microorganisms required for broad-spectrum and hospital disinfectant claims. They have demonstrated efficacy against the following specific organisms.

Organism	Contact Time	
	Liquid Spray	Wipe
<b>DISINFECTING</b>		
<b>Bacteria:</b>		
Escherichia coli (E. coli)	5 minutes	N/A
Klebsiella aerogenes	5 minutes	N/A
Listeria monocytogenes	5 minutes	Currently under review
Methicillin Resistant Staphylococcus aureus (MRSA)	10 minutes	10 minutes
Pseudomonas aeruginosa	5 minutes	10 minutes
Salmonella enterica	5 minutes	10 minutes
Staphylococcus aureus	10 minutes	10 minutes
<b>Viruses (enveloped):</b>		
African Swine Fever virus	10 minutes (Pending EPA approval)	N/A
Human coronavirus (OC43)	5 minutes	5 minutes
Human Immunodeficiency Virus (HIV) Type 1	10 minutes	10 minutes
Influenza A virus	5 minutes	10 minutes
Influenza A virus (H1N1)	5 minutes	5 minutes
Influenza A Avian virus (H3N2)	10 minutes	N/A
SARS-CoV-2 (COVID-19 virus)	1 minute	1 minute
<b>Viruses (small non-enveloped):</b>		
Foot and Mouth Disease virus	10 minutes (Pending EPA approval)	N/A
Norovirus	5 minutes	N/A
Rhinovirus type 14	5 minutes	5 minutes
<b>Fungi:</b>		
Candida albicans	10 minutes	N/A
Trichophyton interdigitale	10 minutes	N/A
<b>SANITIZING</b>		
<b>Food Contact Sanitizer:</b>		
Escherichia coli (E. coli)	30 seconds	Currently under review
Staphylococcus aureus	30 seconds	Currently under review
<b>Non-Food Contact Sanitizer:</b>		
Escherichia coli (E. coli)	30 seconds	Currently under review
Klebsiella aerogenes	N/A	30 seconds
Staphylococcus aureus	30 seconds	30 seconds
<b>Carpet Sanitizer:</b>		
Klebsiella aerogenes	60 minutes	N/A
Pseudomonas aeruginosa	60 minutes	N/A
Staphylococcus aureus	60 minutes	N/A
<b>Fabric Sanitizer:</b>		
Klebsiella aerogenes	10 minutes (Pending EPA approval)	N/A
Staphylococcus aureus	10 minutes (Pending EPA approval)	N/A
<b>Mildewstat:</b>		
Aspergillus niger	No growth for 7 days	N/A
<b>EMERGING PATHOGEN CLAIMS</b>		
This product meets the criteria for use against emerging viral pathogens when used in accordance with the corresponding Direction for Use	Enveloped viral pathogens - Rhinovirus type 14 • Large, non-enveloped viral pathogens - Rhinovirus type 14 • Small, non-enveloped viral pathogens - Norovirus and Rhinovirus type 14.	Enveloped viral pathogens - Rhinovirus type 14
